

Care for our World

Family Supplement

We have been talking about God making the world and how we are to care for it. Share this experience with your child by growing one of the following (suggestions at the bottom of this page) together at home. Encourage the whole family to care for this living thing.

1. Growing seeds on wet cotton wool or in a cup of soil (apple, bean etc.)
2. Plant flowers or vegetables in the garden.
3. Decorate these shapes and stick them to your wall to remind you to take care of the world.
